

Data Center Relocation Services

SHERLOCK SERVICES

Providing Support
Experience and Dedication
Since 1991 for Multi-
Vendor Data Centers

Sherlock Services provides premier infrastructure services for Storage, Servers, Networking Systems and Printers. Our hardware support experience includes 3PAR, Hitachi, Nimble, Nexsan, HPE, Dell EMC, Compellent, NetApp, IBM, SUN and more. The Sherlock Services Mission is to support our customer's infrastructure so they can operate 24x7x365 without interruption to their business.

NEED MEDIA

DESTRUCTION OR ITAD?

Getting rid of unwanted computer equipment presents challenges to company's IT department as they discover they can't just toss it out. Sherlock Services ensures all equipment is properly disposed of and all media is securely erased and shredded. We meet all NIST and EPA standards and conform to your company's requirements.

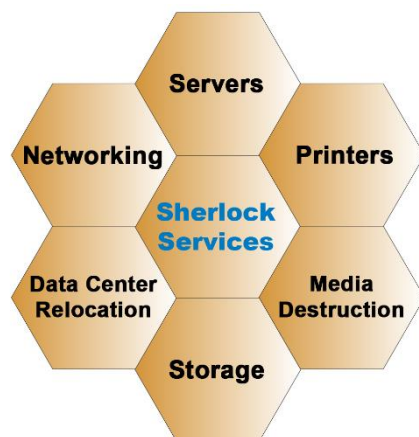

Worry Free Third Party Maintenance

Let Sherlock Services design an action plan for relocating your Data Center equipment. We minimize downtime, control spending, reduce liability and provide a smooth transition for a single system or your entire environment. With years of experience behind us, we move equipment between buildings on the same campus or across the country. We can get you where you need to be.

Physical Migration – Your equipment is too critical to leave in the hands of inexperienced movers. Sherlock Services offers complete relocation moves using our state-of-the-art moving strategies, supplies and trucks. Once in the new location we offer re-racking and confirm that your system is fully functioning.

Project Planning and Management - We have a proven methodology of careful planning to ensure everything has been given careful consideration. We protect your organization's equipment and keep you up and running throughout the life cycle of the project. Our team will walk you through every step to assure that everyone understands our process and more importantly, we understand your requirements.

On the Side of Caution – We understand your equipment and ensure that it is fully functional prior to the move. We always recommend backing up your environment, powering down all equipment and powering up at a minimum of one week prior to the move to allow for any hardware or software issues to come up now and be addressed instead of after the move.

When it comes to supporting IT, we're at your Service.
